

## DOWN FLOW BENCH

Ideal for anyone seeking a reliable, high-performance workstation, the Downflow Bench provides a streamlined and efficient solution for your work environment.

### Key Features

- **Premium Work Surface:** 800 x 600mm stainless steel with perforations for enhanced airflow and drainage, ensuring a clean and efficient working area.
- **Splashback Protection:** Equipped with a 150mm splashback to prevent water spillage and maintain a tidy workspace.
- **Versatile Water Tap:** The integrated tap provides both a hand-held shower and a water washdown system, allowing for easy cleaning of the work surface and surrounding areas.
- **Efficient Drainage:** A 200mm stainless steel spigot allows for easy drainage, with a 90° turn to exit on the left side of the bench. The unit also features a 50mm drain, ensuring quick and effective water removal.
- **Durable Construction:** The unit's robust stainless steel design ensures long-lasting performance, even in high-demand environments.

## Airflow and Containment

- **Downflow Ventilation:** Designed to maintain controlled airflow from the top to the base of the work surface, ensuring containment of fumes, particulates, and contaminants.
- **Filtration (optional based on your needs):** Can be fitted with HEPA/ULPA filtration options for enhanced air quality.

## Additional Features

- **Customization:** Available in various sizes to fit different lab setups and specific client requirements.
- **Energy Efficiency:** Designed to minimize energy consumption while providing optimal airflow and filtration.
- **Easy Maintenance:** The seamless construction and accessible design make cleaning and maintenance hassle-free.

Ideal for anyone seeking a reliable, high-performance workstation, the Downflow Bench provides a streamlined and efficient solution for your work environment.
